

How To... Choose Laptop Luggage

All mobile workers need some way of transporting their laptop - and all the accessories - around with them. Different users require different functions from their laptop case, and there are several different elements to consider:

Laptop Size

Laptops come in a variety of shapes and sizes. To specify bag sizes, Hypertec use the diagonal measurement across the screen. Our bags are available to suit screens with diagonal measurements up to 20". Most cases can take smaller laptops, with padding which can be altered to keep the machine secure.

Laptop Size

Amount of Accessories and/or Paperwork

All laptop bags have a varying amount of space, pockets, and compartments for different needs. Our spec sheets all describe the amount of storage space available.

Accessories

Backpack, Roller Bag, Shoulder Bag?

Whilst roller bags and rucksacks are certainly the most ergonomically sound, shoulder bags are still extremely popular for the business user. Remember backpacks don't look like laptop bags - therefore disguising the contents and reducing the risk of theft.

Smart or Casual?

Hypertec's range of bags contains several different looks, with real leather cases, business-like black nylon, bright and colourful college bags, and ladies' 'shopper' style bags.

Printers & Projectors?

Hypertec carry a selection of bags which include space for both a laptop, and a printer or projector. These are ideal for mobile workers frequently making presentations or needing to print quotes etc whilst out and about. Cases include power and connection cables for easy use.

Bag Types

Branding

Hypertec luggage is available to be printed or embroidered with company details, be it a logo, contact details, or other slogan. MOQs apply.

Budget

Our range of over 150 bags has been put together to ensure there is a bag to suit every budget.
