

How To... Use A Laptop Lock

Hypertec How To Guides: Accessories

Laptop locks are a great visual deterrent for potential thieves, and will protect a laptop (or other equipment) in the office, home, or other working location.

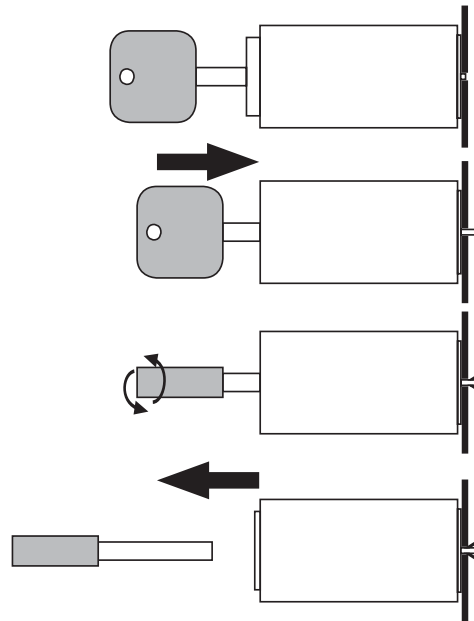

1. Loop the cable round solid fixing point; such as a heating pipe, desk leg, or other piece of solid furniture.
2. Feed cable through loop at end, to secure it into place.
3. Insert lock into Notebook (or other equipment's) security slot.
4. Push key into lock.
5. Turn key until lock has fixed into place.
6. Remove key and release lock.
7. Keep key in a safe place.
