

The miniBus 32 is a robust, cost effective mobile storage and charging solution for up to 32 devices, from iPads and tablets through to Chromebooks and laptops up to 16" screen size.

Manufactured in the UK from the highest quality materials and as with all CompuCharge® charging solutions, made to comply with EN60950:2000. The miniBus 32 has been designed as a compact, lightweight method of storing and charging any device up to a 16" screen size.

Simple cable management system allows for cables and AC adaptors to be stored safely.

With large spacing between each shelf for ease of access and fully ventilated, which completely removes any potential for the overheating problems that can be found in some of the lower quality products in today's marketplace.

"Multi-brand compatible", this means there is no restriction on the make or mix of tablets, laptops, or Chromebooks to be charged. For example, a miniBus 32 could simultaneously charge 32 different brands of mobile device.

Outlets are fitted inside the rear panel for secure access and connection, with 2 metres of mains cable. Please note that a twin 13 amp wall socket is required.

Approximate dimensions 1,260mm high x 630mm wide x 590mm deep.

All products sold by CompuCharge® are supplied with a Lifetime Return to Base (RTB) Warranty.

Heavy duty construction, secure and designed for ease of use.
