

Ergonomic Excellence for Mobile Dual-Monitor Setups

Why You Should Work Ergonomically with Dual Monitors

workplace ergonomics

The Challenge

Setting up a secondary portable screen next to a laptop offers a massive productivity boost, but relying on makeshift desktop setups frequently leads to severe physical strain:

Hunched Back: Slumping in a “C” shape causes long-term back pain and spinal pressure.

Neck Strain: Looking down at a low screen puts heavy stress on neck muscles and nerves.

Rounded Shoulders: Reaching forward tightens the chest and leads to shoulder tension.

The Solution: X-Stand

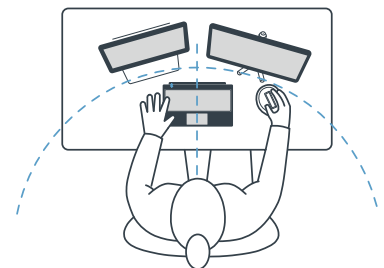

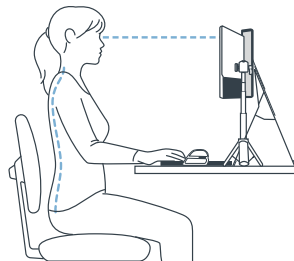

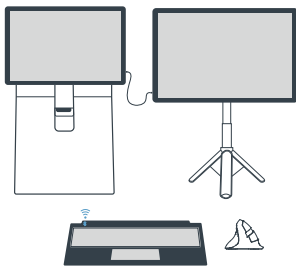

The X-Stand instantly transforms any mobile setup into a health-compliant, dual-monitor workstation by lifting your secondary screen to perfect alignment with your laptop:

Eye-Level Screen: Raise the monitor so the top of the screen is at eye level to keep your neck straight.

Upright Posture: Sit back into the chair using the backrest to maintain the natural curve of your spine.

Relaxed Shoulders: Keep your elbows close to your body and shoulders down to prevent upper body tension.

X-Stand

Product Highlights

Designed for ultimate portability and structural integrity, the X-Stand delivers premium ergonomics without sacrificing mobility:

Ergonomic Compliance: Fully complies with strict European and UK ergonomic regulations, actively protecting users from workplace strain.

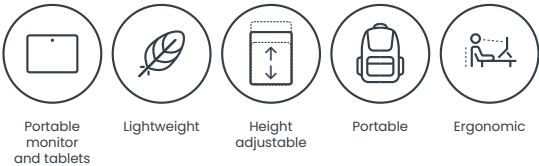

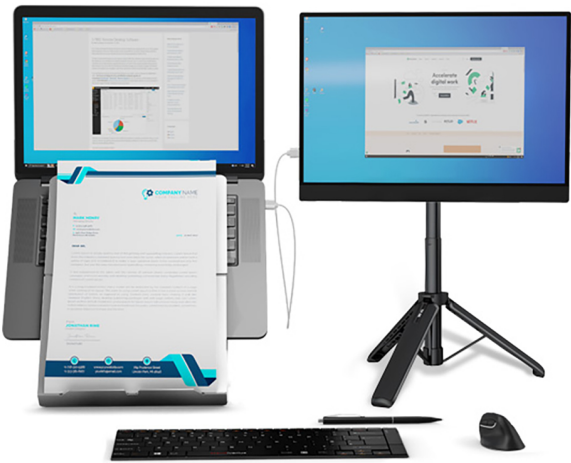

Featherlight Mobility: Weighing only 212g and folding down to just 20cm, it slips effortlessly into any standard laptop bag.

Instant Magnetic Docking: Features a premium snap-on magnet connect for quick, tool-free setup and breakdown.

True Eye-Level Flexibility: Extending up to 55cm to accommodate varying heights and seating postures.

Travel-Ready Durability: Accompanied by a protective hard shell case that features built-in storage space for your cables and accessories.

Minimal Desk Footprint: Engineered to maximize your workspace by requiring minimal physical surface area.

Technical specifications

Material	aluminum alloy + ABS
Height	max. 55cm
Suitable devices	portable monitors and tablets up to 1.5 kg
Connector	snap-on magnet
Folded Length	20cm
Colour	black
Weight	212g
Product code	ST-XSTDT-B
