QDD-400G-ZR-AO

Juniper Networks[®] QDD-400G-ZR-S Compatible TAA 400GBase-ZR QSFP-DD Transceiver (SMF, Coherent, LC, DOM, ZR)

Features

- Hot pluggable QSFP-DD footprint (Type 2A)
- 8x 26.5625GBd PAM4 Serial Electrical Interface (400GAUI-8, RS(544/514) FEC)
- Supports 425Gbps Data Rate
- Tunable C-band Transmitter
- Coherent Receivers
- Duplex LC connector
- Up to 120km Point-to-Point Transmission on Single Mode Fibre
- C-FEC (15%) with 10.7dB Net Coding Gain
- Power Dissipation < 18.3W
- Commercial Temperature -5 to 85 Celsius
- Single +3.3V Power Supply

Applications

- 400GBase Ethernet
- Access and Enterprise

Product Description

This Juniper Networks[®] QDD-400G-ZR compatible QSFP-DD transceiver provides 400GBase-ZR throughput up to N/A over single-mode fiber (SMF) using a wavelength of 1528.77nm to 1567.13nm via an LC connector. It is guaranteed to be 100% compatible with the equivalent Juniper Networks[®] transceiver. This easy to install, hot swappable transceiver has been programmed, uniquely serialized and data-traffic and application tested to ensure that it will initialize and perform identically. Digital optical monitoring (DOM) support is also present to allow access to real-time operating parameters. This transceiver is Trade Agreements Act (TAA) compliant. We stand behind the quality of our products and proudly offer a limited lifetime warranty.

AddOn's transceivers are RoHS compliant and lead-free.

TAA refers to the Trade Agreements Act (19 U.S.C. & 2501-2581), which is intended to foster fair and open international trade. TAA requires that the U.S. Government may acquire only "U.S. – made or designated country end products."

Rev. 090723

Absolute Maximum Ratings

Parameter	Symbol	Min.	Тур.	Max.	Unit	Notes
Power Supply Voltage	VCC	3.135	3.3	3.465	V	
Storage Temperature	Ts	-40		85	°C	
Case Operating Temperature	Тор	-5		80	°C	
Relative Humidity (non-condensing)	RH			85	%	
Optical Receiver Overload				1	dBm	1
Supported Host Signal Types			425		Gbps	2
Line Baud Rate			59.84375		GBd	3

Notes:

- 1. The optical input to the receiver should not exceed this value. Transmitters must never be directly connected to receivers before ensuring that proper optical attenuation is used
- 2. As per IEEE 802.3bs-2017
- 3. 400G DP-16QAM, C-FEC

Electrical Characteristics

Parameter	Symbol	Min.	Тур.	Max.	Unit	Notes
Power Supply Voltage	Vcc	3.135	3.3	3.465	V	
Power Supply Current	lcc			6	А	
Power Consumption	PD		15.8	18.3	W	
Power Consumption	PD			1.5	W	1

Notes:

1. Low power mode

Optical Characteristics

Parameter	Symbol	Minimum	Typical	Maximum	Unit	Notes	
Transmitter							
Average Output Power	Ро	-10	-8.5	-6	dBm	1, 2	
Laser Linewidth				300	kHz		
Transmitter VOA Dynamic Range		10			dB	3	
Output Power Stability		-1		1	dB		
In-Band OSNR		40			dB/0.1nm		
Out-of-Band OSNR		35			dB/0.1nm		
Frequency Range		191.275		196.125	THz	4	
Centre Frequency		ν _T -1.5	VT	v _T +1.5	GHz	5	
Channel Spacing		6.25			GHz		
Centre Wavelength Range	Τλ	1528.58		1567.34	nm

Acquisition Range		-3.6		3.6	GHz	10	
Upstream Tx Linewidth				500	kHz		
OSNR Tolerance			24	26	dB	11	
Crosstalk Tolerance				7	dB	12	
Chromatic Dispersion Tolerance				2400	ps/nm	13	

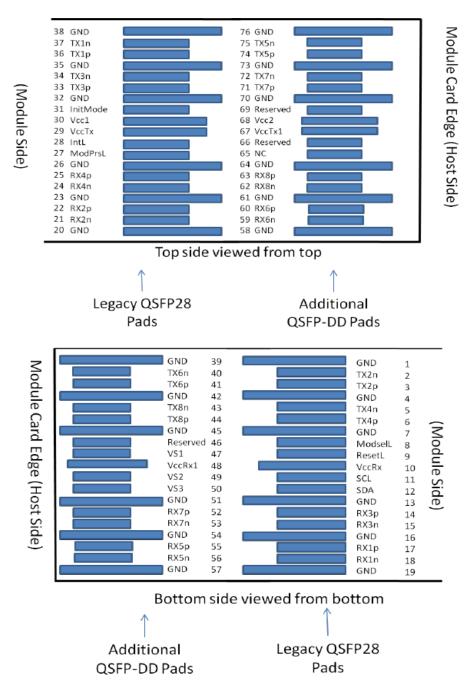

Notes:

- 1. Output power coupled into a $9/125 \mu m$ single mode fibre
- 2. The output power is settable in steps of 0.1 dB within the specified wavelength range
- 3. With Tx VOA attenuation set to minimum
- 4. Per ITU-T G.694.1 DWDM grid definition
- 5. Applies also to LO
- 6. Minimum input power needed to achieve post-FEC BER ≤10⁻¹⁵, 400G DP-16QAM, OSNR>35dB
- 7. The optical input to the receiver should not exceed this value. Transmitters must never be directly connected to receivers before ensuring that proper optical attenuation is used
- 8. An input power in this range guarantees optimum OSNR performance
- 9. With ≤1dB OSNR tolerance degradation
- 10. Frequency offset between received carrier and LO
- 11. At optimum input power range

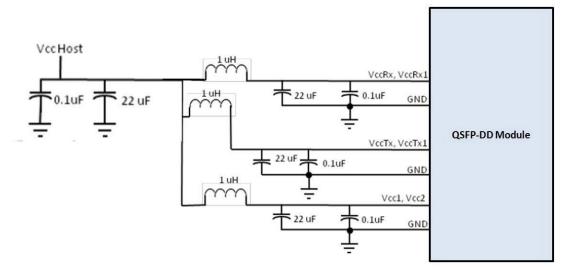

- 12. Ratio of accumulated crosstalk channels to signal power
- 13. Less than 0.5dB receiver sensitivity penalty compared to OSNR>35dB

About AddOn Networks

In 1999, AddOn Networks entered the market with a single product. Our founders fulfilled a severe shortage for compatible, cost-effective optical transceivers that compete at the same performance levels as leading OEM manufacturers. Adhering to the idea of redefining service and product quality not previously had in the fiber optic networking industry, AddOn invested resources in solution design, production, fulfillment, and global support.

Combining one of the most extensive and stringent testing processes in the industry, an exceptional free tech support center, and a consistent roll-out of innovative technologies, AddOn has continually set industry standards of quality and reliability throughout its history.

Reliability is the cornerstone of any optical fiber network and is in engrained in AddOn's DNA. It has played a key role in nurturing the long-term relationships developed over the years with customers. AddOn remains committed to exceeding industry standards with certifications from ranging from NEBS Level 3 to ISO 9001:2005 with every new development while maintaining the signature reliability of its products.
