

## ErgoSlider Plus Underarm Support Asymmetrical

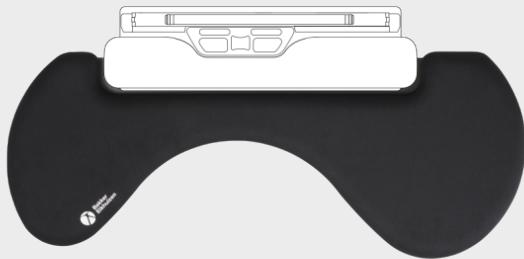

**Designed to provide support and comfort for your arms while you work at your desk and computer.**

The ErgoSlider Plus Underarm Support is a useful accessory for anyone who spends a lot of time working at a desk with the computer and wants to improve their comfort and productivity while reducing the risk of developing pain or discomfort. It helps you especially when you don't have armrests on your chair or while you are standing. By resting your arms on the ErgoSlider Plus Underarm Support, your neck and shoulder muscles will be more relaxed, and you will stay in a better body posture. It is optimised for a tabletop thickness from 10 to 32 mm.

### Ergonomic background

When working with a keyboard and mouse it is important that the arm is sufficiently supported. A wrist support helps to keep the wrist straight during typing and can be used "to rest" for a moment during one's work. Holding your wrist at the right height when typing is important. It must be kept as straight as possible with the keyboard. This keeps the wrist posture neutral and avoids muscle strain.
