Why You Should Optimize Your Portable
Triple Monitor Setup

The Challenge

Professionals handling complex data analysis face severe bottle-necks when restricted to a single screen, leading to operational inefficiencies and cognitive overload:

Tab Switching Fatigue: Constantly navigating between applications breaks focus and increases error rates.

Data Comparison Limits: The inability to view multiple large datasets simultaneously slows down analytical tasks.

Compromised Posture: Hunching over a single, cluttered screen strains the neck and shoulders.

The Solution: Doxa Pro 3 Portable Triple Monitor

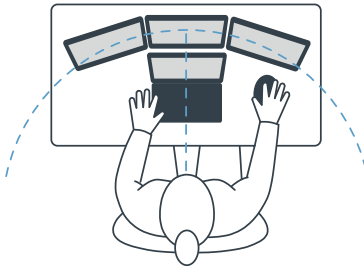

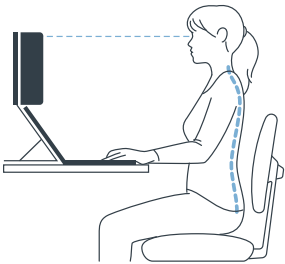

The Doxa Pro 3 instantly transforms a standard laptop into a high-performance workstation, engineered specifically for analysts requiring expansive digital real estate:

Seamless Expansion: Two additional screens flank your laptop, tripling your functional visual workspace.

Optimized Viewing Angle: A secure hinge system allows for precise, stable ergonomic positioning.

Streamlined Workspace: Integrates cleanly with hardware to create a cohesive setup.

Product Highlights

- Expansive Workspace:** Triples your visual real estate with two additional screens, drastically minimizing tab-switching during complex data analysis.
- Single-Hinge Articulation:** Features a precise single central hinge on the outer displays, ensuring stable and reliable angle adjustments for the perfect ergonomic curve.
- Seamless Hardware Matching:** Designed to pair perfectly with laptops, creating a clean, integrated corporate aesthetic without requiring extra desktop pads.
- High-Definition Clarity:** Delivers crisp, clear resolution across all panels to prevent eye strain during extended reading and data review sessions.
- Travel-Ready Folding Design:** Collapses into a highly portable, protective form factor that easily fits into standard professional carrying cases.
- Simple Installation:** Features a streamlined, one-time driver installation process, allowing for fast deployment without recurring software barriers.

Technical specifications

Displays	3 x 15.6" s Full-HD IPS, 1920 x 1080p, 60 Hz
Swivel Angle	Auto magnetic suction in the triangle display mode
Brightness	300(±20) cd/m²
Aspect Ratio	16:9
Connectivity	1 x Type-C Full Function Port (for video output & power supply) 1 x Type-C Power Port(only for power supply)
Product Size	Folded: 434.2 x 298 x 29.5 mm Unfolded: 1000 x 298 x 115 mm
Power Delivery	30W power adaptor, USB Type-C charging port At least 30W power supply is required only if the laptop device does not support an output of 30W
Compatibility	Windows, macOS, Android systems
Weight	3.15 kgs
Product Code	ST-DOXA3-B
Kickstand	Full-aluminium, built-in (black finish)
Adjustable Height	2 levels – 18.5 cm / 25.5 cm
