- · One lock for any slot fits standard T-bar, Nano or Wedge-Shaped laptop security slots, regardless of brand or generation.
- The 5mm keying system is common across all of Kensington's latest locks, so there's only one keying system to manage. A master keying option and custom keying solutions allow you to have one key open all locks, and create supervisor-keyed and like-keyed versions.
- ClickSafe® locking technology allows the lock head to be attached with one hand in a single click.
- Patented anti-pick Hidden Pin™ technology resists tampering and offers peace-of-mind. The 1.8m (6ft) carbon steel cable with plastic sheath delivers the same level of cut and theft resistance as thicker cables.
- · A special pivot and rotate hinge on the cable allows flexible movement and easy key insertion.
- Register & Retrieve[™], Kensington's online key registration program, allows for quick, secure and free key replacement if ever lost or stolen.
- Kensington locks are verified and tested. Each lock is precision engineered to meet or exceed rigorous industry standards for strength, physical endurance and mechanical resilience.
- A five-year warranty means you can rest assured knowing you're covered by Kensington, inventor and worldwide leader in laptop security locks.
