MAKING IT PERFORM

QNAP®
SEAGATE

Harness the Power of NAS-Optimised IronWolf Pro 20TB HDDs

Leading the competition with the highest-performing NAS drive portfolio, Seagate® IronWolf® Pro 20TB hard drives push capacity boundaries – perfect for SMB and creative pro NAS environments.

With conventional magnetic recording technology (CMR) to store and protect crucial data and AgileArray™ firmware for exceptional RAID reliability and NAScompatibility — IronWolf HDDs provide the best user experience for NAS to fit your needs and budget.

High Capacity, Dependable Solutions for Small and Medium Businesses (SMBs)

Offering NAS-optimised AgileArray™ technology, IronWolf Pro 20TB Drives provide exceptional RAID reliability and compatibility during the heaviest NAS workloads that SMBs might require. Designed with built-in rotational vibration (RV) sensors, IronWolf Pro 20TB offers RV mitigation to provide reliable performance for NAS systems with little lag or downtime.

Easy Access and Monitoring with IronWolf Health Management

Keep data safe with built-in data protection that monitors drive health in compatible NAS. IronWolf Health Management provides alerts to intervene before a catastrophic event occurs.

Get Peace of Mind with Data Recovery

Defend your data and your budget against unexpected data loss for any mechanical, accidental or natural disaster. IronWolf Pro 20TB Drives include 3 years of complementary Rescue Data Recovery Services, including: an industry-leading recovery rate of 95%, access to a team of world-class data recovery experts, one in-lab data recovery attempt, and an encrypted storage device containing your recovered data.
